

## Dissemination of Data Validation Study for National AIDS Control Program

Elimination of new HIV & syphilis infections among children and keeping their mothers alive is a priority for the Government of India and is an important component of ensuring universal maternal and child health. ICMR National AIDS Research Institute (ICMR-NARI), conducted an in country 'Data Validation' study which has provided valuable recommendations to the National AIDS Control Program, as part of India's preparation for elimination in 2020. The findings were disseminated nationally on 22<sup>nd</sup> February in N. Delhi by Dr. Sheela Godbole ICMR-NARI, the Principal Investigator of the study.
